

BO-20, Cylindrical Barrier

Passive Oil Barrier (horizontal)

floater horizontally arranged

Technical Information

Total height	55 cm
Diameter of the freeboard	20 cm
Draft (barrier deflector)	35 cm
Segment's length	15 m, special lengths are possible
Weight	3 kg per metre
Floater	foam
Ballast	galvanized chain
Fabric	PVC coated polyester, resistance to UV radiation
Tensile strength (depending on fabric used)	300 kg / 5 cm (PE 680 Complon) – 420 kg / 5 cm (Panama) – 750 kg / 5 cm (BA1200)
Temperature range (fabric)	– 25 °C + 80 °C
Colour	orange; special colours are possible

The mentioned technical information gives typical values, which can be optimized according to technical and operative requirements on request.
